

Payroll and HR Tools Built for Your Business

- Hiring
- Onboarding
- Benefit Enrollment
- Payroll
- ACA Compliance

Easy, Clean Interface with Built-in Guidance

As a business owner, you already have your hands full - you don't need to add "HR expert" to the many hats you wear. Symply's HR Platform is designed to give you everything you need in one place, keep you in compliance, and deliver a sleek user friendly software that saves Time and Money.

Everything You Need, All In One Place

By having all your HR software under one roof, there is no need for segmented data. Gone are the days of reports not including the correct info. All data points across hiring, onboarding, benefits, and payroll are stored in a single database, allowing managers and administrators to get the data they need when they need it.

We Understand Compliance

We force compliance for those industries that have struggled with the ACA mandate and run the risk of receiving tax penalties. Symply's custom onboarding and document builder can automate the new hire onboarding process to make sure everything is saved electronically and stored safely. Our streamlined and user friendly enrollment/declination module will make sure you capture the necessary information to file correctly at the end of the year.

The Most Competitive HR Platform Pricing

Symply is designed to help you and your managers save time, and automate old processes that are inefficient and costly to business owners. Symply is one of the most cost effective platforms on the market. We have the perfect solution with a powerful, yet easy-to-use platform, giving you everything you could need to efficiently manage your workforce.
